CONSULTATIVE SALES FRAMEWORK & DISCOVERY BLUEPRINT

Proprietary Tech: Moov Ninja (150+ Marketplaces & Channels)
Carrier Partners: DPD • DHL • InPost • UPS
Yorkshire Support Desk: 0113 322 4101 | moovparcel.co.uk

Company: _____ **Contact & Role:** _____ **Direct Phone/Email:** _____ **Date & Rep:** _____

Who We Are: Moov Parcel was invented to help e-commerce SMEs be more productive. We give them access to **Moov Ninja**, a proprietary piece of software owned by ourselves, which connects them to over 150 different marketplaces and sales channels. This removes manual work, stops 1-by-1 booking errors, and unlocks new selling channels. Combined with our primary carrier relationships with **DPD, DHL, InPost, and UPS**, we deliver multi-carrier power and real human customer service.

1. THE CONSULTATIVE SALES APPROACH

Our pipeline is a mix of inbound leads and outbound calling. Our outbound proposition is to call the business, reach the **decision maker** (Owner, Director, Operations Manager), and **understand their business before ever pitching rates**. We gather as much operational detail as possible, and then align our software, multi-carrier options, and human service to solve their specific challenges.

2. THE 9 CORE DISCOVERY AREAS (WHAT REPS MUST UNDERSTAND)

DISCOVERY AREA	TRIGGER QUESTION TO ASK (VERBATIM SCRIPT)	OPERATIONAL FOCUS & NOTES
1. Parcel Volumes	"Roughly how many parcels are you dispatching on an average day or week? Does that volume spike significantly during peak periods or promotions?"	Establish baseline daily/weekly parcel volume and seasonal surge capacity.
2. Destinations	"Where do these orders go? Are you primarily UK domestic mainland, or do you send to the Scottish Highlands, Islands, Northern Ireland, or Europe?"	Identify regional domestic distribution and cross-border customs requirements.
3. Recipient Profile	"Who receives the goods — direct to consumer (B2C) residential addresses and lockers, or B2B trade and commercial retail addresses?"	Matches parcel profile to carrier capabilities (e.g. InPost lockers vs B2B trade).
4. Sizes & Deadweights	"What does your parcel profile look like in terms of size and deadweight? What are your typical minimums and maximums?"	Examine deadweight vs volumetric limits to prevent carrier surcharge penalties.
5. International Shipping	"Do you ship internationally, either to Europe or the rest of the world? How do you currently handle customs and IOSS?"	Positions DHL Express / eCommerce capabilities and customs compliance.
6. Hazardous / Special Cargo	"Do you send anything that is hazardous, liquids, creams, glass, aerosols, batteries, or anything outside of the norm?"	Identifies dangerous goods (ADR) compliance and restricted carrier items.
7. Packaging Requirements	"Do you have any specific packaging requirements — for example, poly mailers, custom branded boxes, long tubes, or 6x4 thermal labels?"	Ensures packaging format compatibility with carrier sortation belts.
8. Software & Booking Method	"How do you book your parcels right now? Are you booking them one by one? What channels (Shopify, Amazon)? If you use a WMS, which one?"	**Key Software Trigger:** If booking 1-by-1, Moov Ninja automates this completely.
9. Couriers, Cut-offs & Pain	"Which couriers are collecting today? What time would you need a vehicle to collect from you if you were to move? Any challenges with price, service, or damage?"	**Cut-Off Trigger:** If driver collects too early, switch carriers. Isolate service pain.

3. THE POWER OF THE DEMO: WHY WE DEMO & RESEARCH BACKING

Sales Research Insight (Gong / Gartner): B2B sales data shows that technology-enabled services convert at up to **68% higher win-rates** when prospects experience a live product demonstration compared to receiving static rate quotes. When prospects see a rate sheet, they compare pennies; when they see Moov Ninja on screen, they see their morning dispatch headache disappearing.

The 9 Problems Moov Ninja Solves (The Demo Showcase):

1. Multi-Channel Connectivity
Pulls 150+ channels (Shopify, TikTok Shop, Amazon, eBay) into one screen. Solves logging into multiple separate web portals.

2. 1-Click Batch Shipping
Prints up to 100 shipping labels and pick lists simultaneously. Solves slow 1-by-1 manual typing and copy-paste errors.

3. Internal Packing Station
Barcode scan verification confirms each item in the carton before printing. Solves packing errors and wrong items sent.

4. Multi-Parcel International
Specialized workflow for multi-box overseas consignments that competitor software cannot support or breaks on.

5. Carrier Error Message Visibility
Displays exact courier error codes (postcodes, tax IDs) so warehouse staff can fix and print labels instantly.

6. Easy International Shipping
Automated commercial invoices and seamless EU IOSS compliance. Solves international border holds and paperwork headaches.

7. Ninja Status Gamification
Visual Ninjas alert warehouse staff immediately when exceptions, address errors, or carrier delays occur.

8. Direct-to-Printer Integration
Integrated printer software sends labels directly to 6x4 Zebra thermal printers without PDF dialogues or downloads.

9. Smart Shipping Rules Engine
Automatically selects optimal carrier (DPD, DHL, InPost, UPS) based on weight, parcel dimensions, country, or postcode.

> ***Verbatim Rep Demo Pitch:*** *"Anyone can email a list of prices that looks like every other courier. Let me show you 10 minutes on a quick screen share of how Moov Ninja actually connects your store, prints 100 labels in one click, and chooses the right carrier automatically. Do you have your screen open?"*

4. THE 7–10 DAY GUIDED ONBOARDING JOURNEY

PHASE 01
Welcome to the Team
Warm introduction into the Moov team by their dedicated specialist. Review discovery profile, volume patterns, and operational requirements.

PHASE 02
IT & Software Setup
Provision Moov Ninja credentials and configure native store connections (Shopify, TikTok Shop, Amazon, WooCommerce) to verify live SKU & order ingestion.

PHASE 03
Courier Account Applications
Moov directly applies for and coordinates dedicated sub-accounts with DPD, DHL, InPost, or UPS to lock in collection routes and vehicle timings.

PHASE 04
Workflow Training Call
Dedicated 1-on-1 walkthrough call showing staff how to use Moov Ninja, helping them set up box defaults, 6x4 thermal printer output, and custom routing rules.

PHASE 05
Agreed Go-Live Date
Firm, mutually agreed go-live date locked in with warehouse and carrier driver. First live batch collected; team actively tracks collection and hub scanning.

PHASE 06
Follow-Up Action & Support
Proactive post-launch check-in to verify scan rates, audit invoice accuracy, and transition to our permanent Yorkshire support desk (0113 322 4101).
